

VIII. TRASH COLLECTION AND REMOVAL PROCEDURES

- 8.1. All recyclable and trash items must be placed at the street curb on the designated collection day, except government holidays, in which case recyclable trash items will be collected the following business day. Recyclable items are to be placed in designated recycling containers, paper bags, or other suitable containers. All trash items (non-recyclable items) are to be placed in secure, self-contained and covered containers or securely tied trash bags. The use of disposable trash bags is encouraged to avoid obstructing mailboxes for mail delivery later in the day.
- 8.2. Trash and recyclable items may not be placed at the street curb for pickup before dusk on the day before the scheduled pickup.
- 8.3. Residents must make individual arrangements with a licensed trash contractor or other licensed contractor for the removal of any large trash items that contain hazardous materials (e.g. Refrigerators).
- 8.4. Christmas trees may be placed at the street curb for collection on the special collection dates scheduled by the management company.
